SUMMARY

Full-Stack Developer with hands-on experience building scalable, production-ready web applications using React.js, Next.js, Node.js, and FastAPI. Contributed to Urbanum.ai by optimizing REST APIs and UI performance, improving application speed by 20% and cutting database latency by 35% across PostgreSQL and MongoDB. Skilled in translating business requirements into responsive, high-performance interfaces and efficient backend systems.

Strong in **Data Structures & Algorithms** and problem-solving, with growing expertise in **AI-integrated applications**. Actively seeking opportunities in product-based companies to build high-performance and scalable solutions.

EXPERIENCE

ModernTouch Consultancy & Construction LLP **Mar 2025 – Aug 2025**
Full Stack Web Developer Intern ***Stipend: 10,000/month*** *Nagpur, Maharashtra*

- Developed and maintained a full-stack web application **(Urbanum.ai)**.
- Built REST APIs and handled backend logic for scalable features.
- Designed responsive UI improving user experience and usability.
- Managed database integration and optimized application performance.
- Integrated **AI-based features** into web applications.

EDUCATION

Ramdeobaba College of Engineering and Management **Expected 2027**
B.E. Computer Science & Engineering (Data Science), CGPA: 7.5 *Nagpur, Maharashtra*

SKILLS

Languages: JavaScript, Python, Java, SQL
Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, FastAPI
Databases & Cloud: MongoDB, MySQL, PostgreSQL, Firebase, Supabase
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, RESTful API Design
AI & Tools: OpenAI API, LangChain, Prompt Engineering, GitHub Copilot, Cursor AI
Development Tools: Git & GitHub, CI/CD, Responsive Design, Deployment

PROJECTS

Urbanum.ai – Improved application performance by 20% and reduced database query latency by 35% by developing scalable REST APIs and optimizing PostgreSQL/MongoDB integration for a production full-stack platform.

MERN Stack Applications – Increased user session duration by 15% by building multiple full-stack applications with secure authentication, real-time dashboards, and RESTful APIs using MongoDB, Express.js, React.js, and Node.js.

AI Integrated Applications – Accelerated feature delivery and automation workflows by building AI-powered application features using OpenAI API, LangChain, and structured prompt engineering techniques.

ACHIEVEMENTS

- **Runner-up – Hacksphere 2.0:** Achieved runner-up position in a national-level hackathon showcasing technical excellence and teamwork.
- **SIH Internal Hackathon:** Secured 1st place by building an innovation-driven, real-world solution.

- **India Innovates 2026 Hackathon:** Selected among top-performing teams nationwide for delivering scalable and impactful solutions.
- **IEEE SASIGD 2026:** Co-authored a research paper titled “A Smart Mechanism for Accelerating CO2 Mineralization in Spodumene Tailings Through Hybrid Shrinking Core Model and Physics-Informed Neural Network Framework” for the 2026 International Conference on Sustainable AI for Social Impact and Global Development.

CERTIFICATIONS

- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate:** Certified in core AI concepts, machine learning fundamentals, and generative AI on Oracle Cloud Infrastructure, with practical exposure to AI-driven data analytics, risk profiling, and predictive modeling.
- **Tata – Generative AI Certification:** Completed certification covering generative AI principles, large language model fundamentals, and practical applications of AI tools in real-world business and development workflows.
